

Construction Activities at T-39; SR 169 Widening-1 Improvements (Witte Road SE to SE 240th Street) Project

UPDATE

As part of the City of Maple Valley's commitment to develop and maintain a multi-modal transportation system that is safe, economically and environmentally sustainable, and supports community livability, crews will soon begin work to widen and improve sections of SR 169.

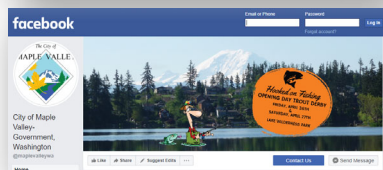

Roadwork along SR 169 from Witte Road to SE 240th Street starts **Monday, April 22nd**. Construction activity will typically occur between 7am and 5pm Monday through Friday. Motorists are cautioned to observe and obey construction signs. Expect narrower lanes and lane shifts. The southbound bicycle lane will be merged with traffic. The center lane will be eliminated, resulting in potential turning restrictions.

Tree clearing and grading activities will run from 7am to 5pm Monday through Friday beginning **Monday, April 29** for several weeks, which may create temporary delays for motorists.

Project updates will be available online on the City's website and Facebook page.

<https://www.facebook.com/pg/maplevalleywa/posts/>

Project Includes:

- Curb, gutter, landscape strip, 6-8' wide sidewalk, intermittent retaining wall, and bicycle lane on east side of SR169
- A second northbound travel lane; center/left turn lane and planted median where warranted
- Water quality treatment and stormwater flow control using low impact development facilities
- ADA compliant curb ramps at SE 240th and Witte Road SE crossings
- Channelization improvements along SR 169 and along SE 240th Street at SR 169

Project Objectives Are:

- Complete a 5-lane multimodal transportation facility
- Decrease congestion and address known major development (6,000+ homes) in an outside jurisdiction
- Provide additional capacity and improved safety

PROJECT OVERVIEW

T-39; SR 169 Widening-1 Improvements Project

Construction of street improvements within the right-of-way of SR 169 (approximately 2,400 LF), between Witte Road SE and SE 240th Street, including but not limited to removing existing pavement, sidewalk, and curb; constructing new pavement, curb, gutter, sidewalk, planter medians, concrete medians, soldier pile retaining wall; signals, illumination; storm drain system; undergrounding utilities; landscaping; channelization, signing, HMA overlay and other work necessary to complete the Work as specified and shown in the Contract Documents.
